Overview

Are you **Software Engineer** with a passion for building high scale microservices? Do you excel in collaborating with architects, program management, and data disciplines? Do you thrive on solving complex and ambiguous challenges? If so, come join us**!**

We are Windows Notification Services team, a part of the Windows India engineering organization. You will be a cloud services engineer who builds services to support Windows Notification client experiences. As a Software Engineer you will work with other software engineers, designers, and product owners to launch new experiences that integrate with existing systems. We welcome your innovative ideas and fresh perspectives to strengthen our growth mindset culture that is grounded in customer obsession, and diversity and inclusion.

Microsoft's mission is to empower every person and every organization on the planet to achieve more. As employees we come together with a growth mindset, innovate to empower others, and collaborate to realize our shared goals. Each day we build on our values of respect, integrity, and accountability to create a culture of inclusion where everyone can thrive at work and beyond.

Qualifications

Required Qualifications

- Bachelor's Degree in Computer Science, or related technical discipline with proven experience coding in languages including, but not limited to, C, C++, C#, Java, JavaScript, or Python
  - OR equivalent experience.
